SUMMARY

Final-year Integrated B.Tech + M.Tech student in CS (AI & ML) at VIT, graduating 2026. Experienced in full-stack development, blockchain-integrated platforms, and data science. Seeking roles in ML engineering, data science, or full-stack development.

EDUCATION

Vellore Institute of Technology

2021 – 2026

Integrated B.Tech + M.Tech, Computer Science (AI & ML) | CGPA: 7.53 / 10

Relevant Coursework: Data Structures, Algorithms, OOP, DBMS, Machine Learning, Operating Systems

TECHNICAL SKILLS

Languages: Python, Java, SQL, HTML, CSS

Frameworks: Pandas, NumPy, Matplotlib, scikit-learn, React.js, Chart.js, Tailwind CSS

Blockchain & Web3: Solidity, Ethereum Smart Contracts, IPFS, JWT Authentication

Tools: GitHub, AWS (Basics), IntelliJ IDEA, VS Code, Excel, Botpress API

EXPERIENCE

Data Science Intern — inGrade (Remote)

May 2025 – Aug 2025

- Analysed 10+ structured datasets using Pandas, NumPy, and Matplotlib to extract trends supporting product and research decisions.
- Co-authored 5+ research articles and case studies under the Head of Data Science, contributing to published educational content.
- Delivered weekly insight summaries influencing content strategy across 3 ongoing research projects.

PROJECTS

Investor-Business Connect | Full Stack + AI + Blockchain

Aug 2024 – Jan 2025

- Built a full-stack investor-startup platform; implemented ML models for risk assessment (~85% accuracy) and Ethereum smart contracts for secure transactions.
- Integrated JWT authentication + IPFS storage, reducing document retrieval latency by ~40%; designed dashboards using React.js, Chart.js, and Tailwind CSS.
- Designed and implemented real-time investment insights with automated risk scoring, supporting data-driven funding decisions across 50+ simulated sessions.
- Enabled decentralised document management via IPFS, ensuring data integrity and secure access for all platform users.

EduX Platform | Web Development + AI Chatbot

Nov 2023 – Jan 2024

- Developed a learning platform (200+ accounts) with an Excel-based quiz generator, cutting manual quiz creation time by ~70%.
- Integrated a Botpress AI chatbot (500+ queries) and a peer discussion forum (300+ posts); stack: MongoDB, React.js, Node.js.
- Built modular engagement features including user-follow system and threaded discussions, increasing weekly active users by ~35%.
- Designed a responsive UI with role-based access for students and educators, improving platform usability across devices.

ACHIEVEMENTS

- Selected as a finalist in Smart India Hackathon (Internal Round) for an AI-based scalable solution.
- Organised 3+ university-level events with 100+ participants as part of the Fusion Club.

CERTIFICATIONS

- Java Programming – Sheriyans Coding School | 3-Star Java – HackerRank

POSITIONS OF RESPONSIBILITY

- Volunteer, Fusion Club – Organised technical and cultural university events.
- NSS Volunteer – Participated in social initiatives and community service programmes.
